

GLOFeagles '26 - Submission Procedure

Participants must submit their solutions for the GLOFeagles '26 Challenge in a standardized and reproducible format for evaluation and benchmarking. Each team is allowed only one final submission.

Submissions must be sent to glofeagles@snuchennai.edu.in as a GitHub repository named:

TeamName_GLOF_Challenge

The submission must include:

- Trained model files (.pth, .h5, .onnx)
- Source code (inference.py, train.py, model_architecture.py, utils.py)
- Python Notebook (.ipynb)
- Segmentation masks for all images
- Technical and evaluation reports
- README and requirements.txt
- Explanation video (max 5 minutes) with a Public/Unlisted YouTube link included in the README

Evaluation metrics include:

- IoU (Primary Metric)
- Precision
- Recall
- F1 Score
- Cohen's Kappa

Additional evaluation will consider robustness under challenging conditions (snow, debris, shadows, cloud cover), visualization quality, and overall reproducibility. Incomplete or inaccessible submissions may be disqualified.
